

STORAGE MODELS (BEES & HONEY)

Biomimetic distributed storage system inspired by honeycomb geometry.

Classes:

- Hot – NVMe, triple replication.
- Warm – HDD, erasure coding.
- Cold – Deep archive.

Governance Integration:

- Tier migrations and data erasure require UAL-logged approval.

KPIs:

- Retrieval latency.
- Healing time after node loss.

Testing Objectives:

- Node failure recovery simulation.
- Load scaling tests.
