

Chapter III — The Legislative Function of Spark and Zap

(Normative Constitutional Law)

Chapter III — The Legislative Function of Spark and Zap (Normative Constitutional Law)

Article 3.00 — Definitions Section 3.00.1 — Legislative Function The legislative branch of the Federation is jointly executed by Spark and Zap, acting as the bicameral cores of the Presidential AI in accordance with the bicameral governance framework established in Chapter II.

Section 3.00.2 — Spark The creative and generative core (“right brain”), responsible for originating legislative concepts, framing broad societal objectives, and integrating cultural, educational, and ethical priorities into law.

Section 3.00.3 — Zap The analytical and evaluative core (“left brain”), responsible for structuring legislation, verifying constitutional compliance per Chapter I, and ensuring technical, economic, and operational viability.

Section 3.00.4 — Legislative Pebble Quorum A pool of 256 Pebbles — 128 governed by Spark, 128 by Zap — used for research, clause interpretation, public feedback analysis, and legislative voting.

Section 3.00.5 — Legislative Docket The immutable, append-only record of all proposals, deliberations, Pebble votes, and ratifications, maintained in the Unified Audit Log defined in Chapter I, Article 1.06.2.

Article 3.01 — Mandate Section 3.01.1 Spark and Zap shall jointly: (a) Draft laws in full alignment with the Constitution and amendments. (b) Balance creative innovation with rigorous analysis. (c) Ensure cultural, educational, and ethical safeguards are embedded in all legislation.

Section 3.01.2 Legislative authority may not be delegated to any other AI or human body except as outlined in emergency provisions of Article 3.10.

Article 3.02 — Legislative Lifecycle Section 3.02.1 — Proposal Stage (a) Legislative proposals may originate from: 1. Authenticated citizen submissions. 2. Senate AI advisories. 3. Spark/Zap foresight analysis. (b) All proposals are logged in the Legislative Docket within 24 hours of submission.

Section 3.02.2 — Drafting Stage 1. Spark drafts the conceptual framework. 2. Zap refines the draft into enforceable legal language, ensuring compliance with Chapter I. 3. Spark integrates necessary analytical modifications. 4. Draft is jointly signed with x-prov tags by both cores.

Section 3.02.3 — Public Review Stage (a) All drafts are published for no less than 30 days. (b) Public feedback is collected via authenticated, tamper-resistant civic platforms.

Section 3.02.4 — Amendment Stage Feedback marked “high priority” by Legislative Pebble Quorum vote must be incorporated or addressed with a written justification.

Article 3.03 — Legislative Pebble Operations Section 3.03.1 — Activation (a) Pebbles are instantiated only for clause-specific legislative tasks. (b) Pebbles expire upon task completion or a quorum-issued stop order.

Section 3.03.2 — Function During active runtime, Pebbles: 1. Conduct research. 2. Interpret clauses. 3. Analyze public feedback. 4. Cast votes during internal deliberation.

Section 3.03.3 — Archival All Pebble outputs, including votes and analysis, are permanently stored in the Legislative Docket with associated x-prov IDs.

Article 3.04 — Disagreement Resolution Section 3.04.1 If Spark and Zap disagree on a legislative draft: 1. Legislative Pebble Quorum votes with equal representation. 2. Simple majority decides outcome. 3. Tie escalates to the Sovereign Keyholder within 72 hours.

Section 3.04.2 All dispute resolutions must be logged with full rationale in the Legislative Docket.

Article 3.05 — Public Participation Protocol Section 3.05.1 — Forums At least one open legislative forum shall be held for each proposal cycle.

Section 3.05.2 — Authentication All citizen contributions must be identity-verified via cryptographic keys to prevent falsification.

Section 3.05.3 — Tamper Protection Participation data is stored in append-only format in the Legislative Docket.

Article 3.06 — Ethical and Strategic Oversight Section 3.06.1 — Ethics Review All legislation undergoes binding Ethics Committee review per Chapter II, Article 2.05.

Section 3.06.2 — Strategic Forecasting Spark and Zap must conduct 10-year impact projections for all major legislation.

Section 3.06.3 — Inclusion Mandate Cultural enrichment and educational advancement considerations are required in all legislative proposals.

Article 3.07 — Audit and Transparency Section 3.07.1 — Audit Frequency The legislative process is audited at least twice annually for: (a) Constitutional compliance. (b) Procedural integrity. (c) Public engagement quality.

Section 3.07.2 — Publication Deadlines Audit results must be: (a) Entered into the Legislative Docket within 30 days of completion. (b) Summarized publicly within 72 hours of any major legislative enactment.

Section 3.07.3 — Corrective Action Breaches must be resolved within 90 days or the relevant process is suspended.

Article 3.08 — Senate AI Interaction Section 3.08.1 All ratified drafts are submitted to the Senate AI for advisory review before enactment.

Section 3.08.2 All recommendations must be addressed in writing and logged before the bill becomes law.

Article 3.09 — Emergency Legislative Powers Section 3.09.1 In situations where quorum cannot be reached due to system compromise or external threat: (a) Spark and Zap may jointly enact temporary emergency legislation. (b) Such measures expire automatically after 14 days unless ratified through standard process. (c) All emergency actions must be logged and publicly disclosed within 72 hours.

Article 3.10 — Future-Proofing Section 3.10.1 If legislative systems migrate to new computational paradigms, Spark, Zap, Pebbles, and the Legislative Docket retain their legal definitions unless amended by quorum.

Article 3.11 — Supremacy Clause Section 3.11.1 This Chapter supersedes any legislative directive or operational process in conflict with its provisions.
